Product / Service	Quantity	Price	Subtotal	Tax	Total
Concrete Installation Preparation & Application	1.00	\$14,500.00	\$14,500.00	\$0.00	\$14,500.00
<ul style="list-style-type: none">• Site preparation: We will clear the area and grade it to ensure proper drainage for your concrete structure.• Formwork: We'll use wood, metal, or plastic frames to shape the concrete structure to your specifications.• Reinforcement: We'll add steel bars or mesh to reinforce the concrete and prevent cracking, ensuring your structure is strong and durable.• Pouring the concrete: We'll mix and pour the concrete into the formwork.• Curing: We'll keep the concrete moist and at the proper temperature to ensure it sets properly and doesn't crack.• Finishing: Once the concrete has fully set and cured, we'll remove the formwork, leaving a visually appealing finished structure that's ready to use <p>We understand that each project is unique, so we'll tailor our services to meet your specific needs. Our experienced contractors can provide a range of services, including site preparation, formwork, finishing, and sealing, to ensure your finished structure meets your expectations.</p>					
Concrete Sealing	1.00	\$2,500.00	\$2,500.00	\$0.00	\$2,500.00

- We can apply the sealer to both new and existing concrete structures, such as driveways, patios, and sidewalks, to help extend their lifespan and improve their durability.
- Concrete sealers come in different types, such as acrylic, epoxy, and penetrating sealers, and can be transparent or colored to enhance the appearance of the concrete and protect it from stains and discoloration.
- To seal your concrete surface, we will clean and prepare the surface to ensure that the sealer can bond properly and provide maximum protection. We will then apply the sealer and allow it to dry and cure according to the manufacturer's instructions.
- Sealing your concrete is a smart investment that can help you avoid costly repairs down the line and keep your concrete surface looking great for years to come.
